Software Developer

Detail-oriented software developer transitioning from a federal law enforcement career, with strong skills in problem-solving, team collaboration, and agile methodologies. Experienced in Python, JavaScript, and web development, seeking to leverage these skills in a web-development/software engineering internship to contribute to innovative projects.

Skills

Programming Languages: JavaScript, Python

Web Development: HTML, CSS, React, Next.js, Node.js, Express.js, MongoDB, MySQL/PostgreSQL

Cloud/DevOps: AWS (S3, Lambda, EC2), GitHub, CI/CD, Render

Tools: Git, VS Code, Postman, SQL, Agile/Scrum, Microsoft Office

Soft Skills

Problem-solving, strong communication, team collaboration, independent work, reliability under pressure

Projects

- Recipe Management App: Built a MERN stack app with user authentication, recipe CRUD, and admin controls. Integrated OAuth and CI/CD deployment
- Hogwarts House Sorting App: Used Next.js with server-side logic to randomize house assignments at registration. Prioritized accessibility and responsive design
- Portfolio Website: Built using HTML, CSS, and JavaScript to showcase professional projects and development journey
- Inventory Management App: Developed using Node.js and SQL for tracking and organizing item data
- Python Game: Demonstrated object-oriented principles and logic building in game mechanics

Work History

Federal Law Enforcement Officer

April 2009 to January 2024

Department of Homeland Security

- Proficiently worked with and used Microsoft, Adobe, to provide reports and catalog evidence in various databases
- Obtained and maintained government security clearance
- Organized and collaborated team-based law enforcement actions and training
- Supervised an office for day-to-day operations.
- Trained and developed new Officers within their scope of authority.

Education

Brigham Young University–Idaho — *Bachelor of Science in Applied Technology*

Expected Graduation: 2026

- Coursework includes: Full-Stack Web Development, Python Programming, Object-Oriented Design, Agile/Scrum Development, Front-End/Back-End Frameworks, and Cloud Technologies
- Completed multiple software development projects using JavaScript, Python, HTML, CSS, React, Node.js, and SQL
- Engaged in collaborative team environments through weekly Scrum meetings and project sprints

Brigham Young University–Idaho — *Web and Computer Programming Certificate*

Awarded: April 2024

- Focused on practical application of core programming concepts and software design
- Built functional web applications using the MERN stack and other tools

Pima Community College — *Associate of Arts Degree*

Graduated with honors: May 2015
